About The Role

Do you have a passion for design, development, and quality? If so, we have an excellent opportunity! We are looking for a motivated and creative Intern to join a global initiative in robust test automation and CI/CD systems. It is an opportunity to utilize your programming and software testing skills. If this is you, please apply!

Responsibilities

- Learn how our Test Engineering Team at Future Technology Group seek the challenges of Automated Testing by working alongside our Software Engineers in Test, that will mentor and guide you through your internship experience
- Acquire invaluable experience by working with our dynamic Teams to engage, coordinate, and execute on a Project Plan crafted to progress Automated Testing efforts
- Work with cloud, operations, and core software engineers to develop integration and GUI tests for various software components
- Deliver a Presentation at the end of your internship that outlines your project, and its impact on different partners of the team
- Get a first-hand account as to why PlayStation is not just the best place to play, it is also the best place to work, by participating in Team Building Events and Activities

Qualifications

- Has expected graduation date of 2023
- Pursuing a bachelor's or master's degree in Computer Science or related field or ability to demonstrate equivalent knowledge
- Working understanding of any popular programming language (F

Messaging

I would be interested in this position because I feel like I fit the description well. I admire the work playstation puts out oftentimes and it would be a dream of mine to work and see the work that goes into such a company firsthand.

Software Engineer Internship

HP · Spring, TX

Innovation is in HP's DNA. From our origins in a Palo Alto garage in 1939, to our current position as one of the world's leading technology companies, HP has grown to become a leader in technology and corporate culture, inspiring innovators and entrepreneurs around the globe.

HP brings together a portfolio that spans printing, personal computing, software and services to serve more than 1 billion customers in over 170 countries. We are committed to fostering a diverse and inclusive workplace that attracts exceptional talent and to supporting our employees to succeed at all levels. We dream in over 35 languages and share one mission: to engineer experiences that amaze.

Join us for a 12-week paid **Summer 2022 Internship** designed to let you apply your classroom learnings to real world challenges. Our internships have a thoughtful balance of networking, executive speakers, community involvement, big meaty projects (no paper filing here!) and fun!

Responsibilities

As a Software Engineer Intern, you will work with a team with Personal Systems on projects to:

- Document and test new software applications
- Assess of new application ideas
- Enhance products and create new product design
- Develop applications (coding, programming)
- Ensure quality and performance assurance

Messaging

Once again, the job description encourages me to believe this position would be an excellent fit for me. Just the fact they made sure to mention "(no paper filing here)" definitely helps.

As a PM on the Creative Cloud Platform and Ecosystem team, you'll be joining a multi-functional team that drives Creative Cloud's Developer Platform and ensures that third-party developers have positive experiences building on it. We do it all in service of delivering useful and delightful plugins and integrations to creative users around the world.

What You'll Do

- Develop an understanding of business impact and define and be accountable for OKRs and measures of success for the CC Developer Platform.
- Partner with Product and Engineering teams across CC portfolio to operationalize API releases, API ref generation, and public API roadmap updates.
- Collaborate with API product and partnership leads to develop a developer feedback loop, ensuring developer's voice are represented in product roadmaps.
- Manage the Developer Evangelism and Community team.
- Be an advocate for developers, evangelizing developer experience and API best practices to internal product teams.
- Communicate updates on the product roadmap and key initiatives to senior leadership and stakeholders.

Product Manager, Developer Products and ...

ship code to billions of people a day. Our PMs deeply understand their customers, dogfood our products, understand developer pain-points, and come up with 2-3 year visions. They are able to thrive in an ambiguous blue ocean scenario, rationalizing a large quantity of opportunities into a defined and prioritized roadmap. We are thought leaders both internally and externally. We work with engineers and leaders in the company to have a viewpoint on the development tools landscape, both today and in the future. We also collaborate with other technology companies and participate in external summits like IDE summit. You'll be expected to push the boundaries of what's possible in our development products and deliver value to our developers while sharing in our healthy obsession for quality and attention to detail.

Responsibilities

- Lead the vision, strategy, development, and launch of innovative products for Facebook engineers
- Be a customer advocate. Understand the different personas and identify what we can build to empower them to be more productive
- Identifying cross-ownership with partner teams and driving cross-org product efforts
- Drive product development with multiple teams of world-class engineers, designers, and product specialists
- Integrate market analysis, research and usability studies into product requirements
- Define and analyze metrics that inform the success of products

Here are a couple examples of positions that look attractive to me for my future. Actually being a part of the creative process and the consumer/developer relationship more than just coding a spec.
